

NFW-456PX / NFGW-02

WIFI FIRE ALARM CONTROL MODULE

NFW-456PX Wi-Fi Communication Module for Fire Alarm Panels

NFW-456PX Wi-Fi Communication Module is Manufactured to upgrade your fire safety setup with NEVERFIRE Fire Alarm Panels .

Designed specifically for NEVERFIRE fire alarm control panels, this wireless module connects your system directly to the internet via Wi-Fi. It empowers facility managers and security teams with real-time global monitoring and remote-control capabilities. Through the intuitive mobile APP., The administrators can oversee a large network of fire panels simultaneously, receive instant status updates and assign multi-user access permissions for coordinated team oversight.

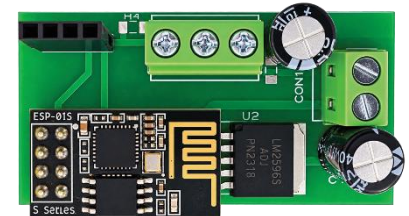

NFW-456PX

NFGW-02 Wi-Fi Communication Module for Fire Alarm Panels

NFGW-02 Wi-Fi Module turns standard fire alarm control panels into smart connected systems, by leveraging wireless Wi-Fi technology. This module bridges your fire alarm setup to the internet and enabling 24/7 global remote surveillance.

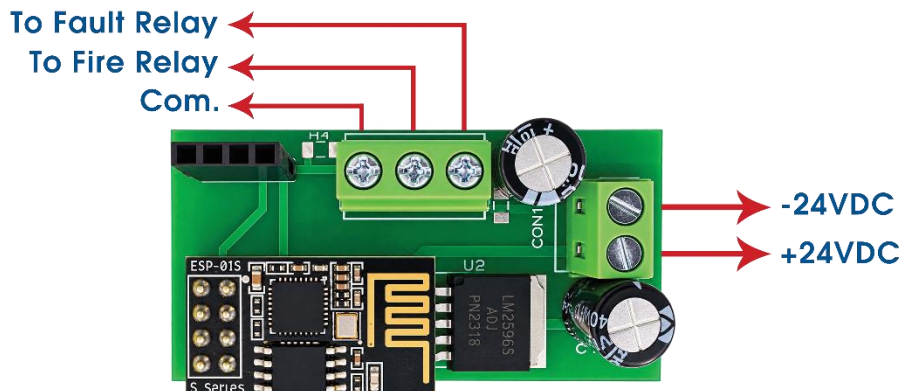

Through the dedicated mobile application, users can track multiple fire alarm panels simultaneously, receive real-time notifications, and grant tailored access permissions to multiple team members or facility managers from anywhere in the world.
